

# **Sight Glass Flow Indicator**

measuring monitoring analysing

# DAI

- Connection: G½...3, ½"...3" NPT, DN 15... DN 200, ANSI 1/2" ... 8"
- p<sub>max</sub>: 40 bar; t<sub>max</sub>: 260 °C
- Materials: carbon steel, stainless steel, PVC, PP, PVDF
- Visual internals: rotor, ball, flap, chain

KOBOLD companies worldwide:

### Dimensions/Weights (not valid for material codes C/S and threaded connections ≤2")

DN 100 ... DN 200

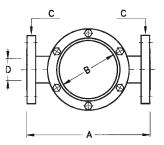

#### Model without visual internals

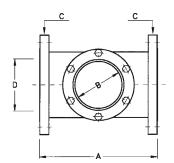

Free passage visual flow indicator for horizontal and vertical mounting. Made in metallic and plastic materials. The plastic type is available up to size DN 80 (3") and for operating pressures as per the tables "Pressure Derating Curve with Temperature for PVC/PP/PVDF".

### Flanged Version

Standard "C" flange EN 1092-1 PN 16 - ANSI 150 RF On request, other types of flanges can be made.

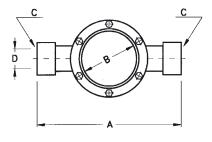

DN 15... DN 80

#### **Threaded Version**

Standard "C" threaded connections G/NPT-F and socket welding

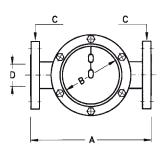

#### Model with chain

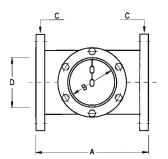

Visual flow indicator with chain to further improve the visibility of flow. This model is not made in plastic materials.

#### Flanged Version

Standard "C" flange EN 1092-1 PN 16 - ANSI 150 RF On request, other types of flanges can be made.

DN 15... DN 80

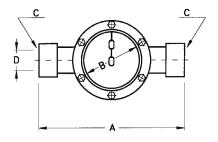

DN 100 ... DN 200

#### **Threaded Version**

Standard "C" threaded connections G/NPT-F and socket welding

## Dimensions/Weights (not valid for material codes C/S and threaded connections ≤2") (continued)

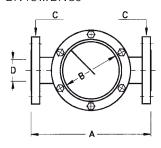

## Model with fixed flap

Visual flow indicator with fixed paddle to create vortex in the passage of the fluid and improve the visibility of flow. This model is not available in plastic materials.

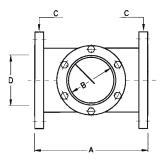

### Flanged Version

Standard "C" flange EN 1092-1 PN 16 - ANSI 150 RF On request, other types of flanges can be made.

### DN 15... DN 80

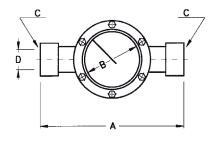

### DN 100 ... DN 200

### **Threaded Version**

Standard "C" threaded connections G/NPT-F and socket welding

### Flanged version
