Fax: +34 93 460 38 76
E-Mail: info.es@kobold.com
www.kobold.com

Edition: Oct. 2022

2 Note

Please read these operating instructions before unpacking and putting the unit in operation. Follow the instructions precisely as described herein.

The instruction manuals on our website WWW.kobold.com are always for currently manufactured version of our products. Due to technical changes, the instruction manuals available online may not always correspond to the product version you have purchased. If you need an instruction manual that correspond to the purchased product version, you can request it from us free of charge by email (info.de@kobold.com) in PDF format, specifying the relevant invoice number and serial number. If you wish, the operating instructions can also be sent to you by post in paper form against an applicable postage fee.

The devices are only to be used, maintained and serviced by persons familiar with these operating instructions and in accordance with local regulations applying to Health & Safety and prevention of accidents.

When used in machines, the measuring unit should be used only when the machines fulfil the EC-machine guidelines.

3 Instrument Inspection

Instruments are inspected before shipping and sent out in perfect condition.

Should damage to a device be visible, we recommend a thorough inspection of the delivery packaging. In case of damage, please inform your parcel service / forwarding agent immediately, since they are responsible for damages during transit.

Scope of delivery:

The standard delivery includes:

- Device model: TTL

4 Regulation Use

The temperature sensors of series TTL are suitable for all applications where processes involving fluids, solid bodies or materials, or gases, require temperature recording and measurement. Our temperature sensors are suitable for use in the following industrial areas: chemicals, petrochemicals, water, feed, food, sanitary, etc.

Any use of the Temperature Sensor, model: TTL, which exceeds the manufacturer's specification may invalidate its warranty. Therefore, any resulting damage is not the responsibility of the manufacturer. The user assumes all risk for such usage.

5 Operating Principle

Thermocouples use the Seebeck effect, state that a voltage is generated at the point of contact of two different metals.

Electrical conductors of different metals or metal alloys are connected by punctiform welding. A thermal e.m.f. is generated at the free ends (point of connection) by heating this junction (measuring junction). The free ends are extended to a point with know temperature (reference junction) by means of compensating leads. The temperature difference between measuring junction is measured with thermocouples.

6 Use in hazardous Areas

6.1 Area of validity

These security instructions apply to **TTL Series** temperature sensors and their accessories for use in explosion-proof atmospheres conform to **CE certificate LOM 08ATEX2015 X**

6.2 Guidelines

The **TTL Series** temperature measuring instruments work according to the Seebeck efect. This measuring principle acts to check and measure the temperature also in Ex areas.

TTL devices can be with a standard 4 to 20 mA signal transmitter, protocol Hart, Profibus/Fieldbus or with direct access to the sensor. They are appropriate for use in Group IIC and Categories 1G/D Atex atmospheres.

The temperature class and/or the surface temperature relates solely to a device operated at ambient temperature. On installation the actual temperature class for process operation must be determined.

The inlet bushings used must conform to the certification for their type in accordance with the directive.

The requirements of Regulation 2014/34/EU, and the applicable national regulations for the use of measuring instruments in Ex areas, such as EN 60079-0, EN 60079-11 and other regulations relating to this certification type, must be fulfilled.

Only qualified specialist personnel may install devices in Ex areas.

6.3 General

- When installing the sensor, it is necessary to follow all the instructions and regulations for explosion-proof areas and the safety instructions included in these instructions.
- **TTL-SN** and **TTL-SA** must be protected with an enclosure at least a degree of protection IP20.
- Make sure that the details on the sensor's type label correspond to the working conditions for the application.
- When installing the device, make sure you do not create any mechanical deformation as a result of solder spots or the application of mechanical force.
- **Important:** Make sure there is an electrical connection between the device's earth and the earth of the system.
- Make sure the lid is closed before putting the device into operation.
- Before re-opening the lid, remove the plug from the mains or de-energise the device and make sure there is no danger of explosion.

6.4 Protection against E.S.D. (Electrostatic Discharge)

Temperature sensors with plastic parts that can become electrically charged bear a warning label. Electrical charging must be avoided at all costs. Pay attention to the following:

- Avoid rubbing the device
- Never clean the device dry
- Do not install the device near material airflows or near steam outlets

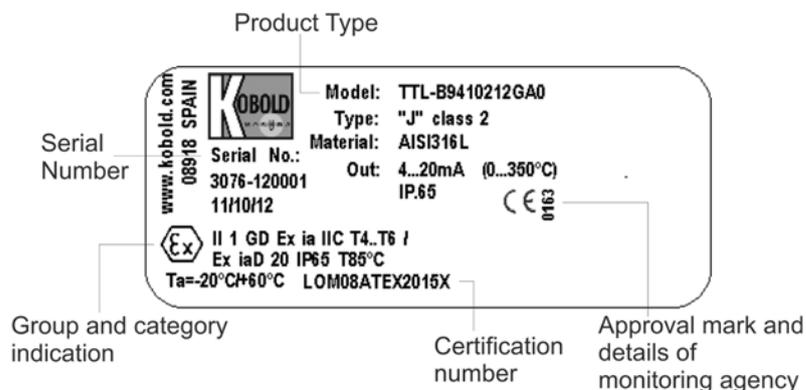

6.5 Maintenance and repairs

The instrument does not require maintenance or servicing.
Repairs must be only carried out by Kobold Mesura (manufacturer)

6.6 Storage

Measuring instruments should be protected against humidity and dust.
Storage temperature: -40°C....+85°C for sensors without transmitter.
Storage temperature: See manual of the corresponding transmitter.

7 Description of the Factory Label

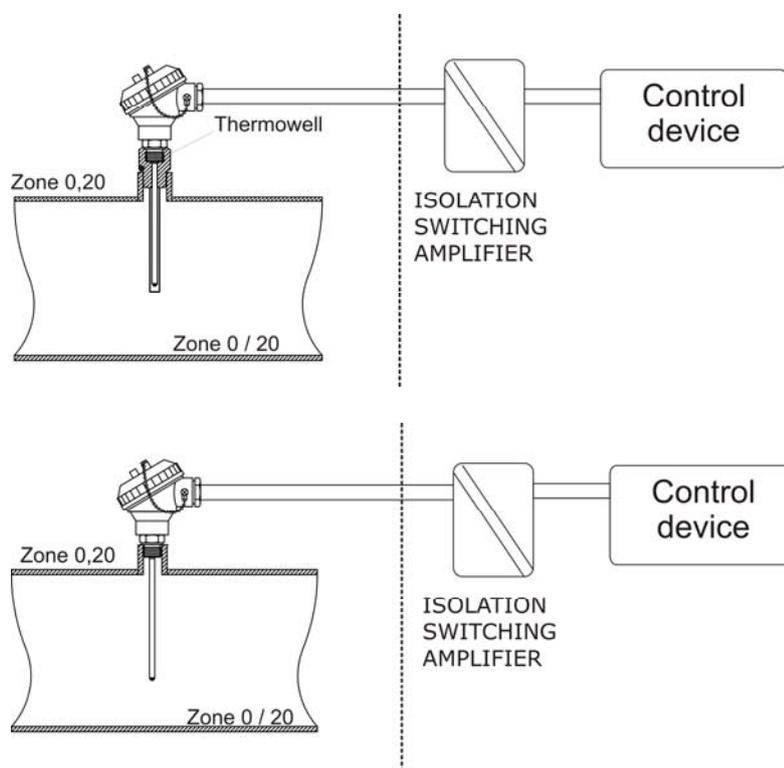

8 Installation in the classified area

8.1 Examples of installation in explosion-proof areas conform to the protection type "intrinsically safe": "Ex ia"

Hazardous area

Safe area

9 Technical Details

9.1 Sensor and accuracy

Type Class Temp. range Limiting error

DIN EN60584 part 2

K	1	-40°C...+375°C	±1,5°C
K	1	+375°C...+1000°C	±0,0040 x (t°)
K	2	-40°C...+333°C	±2,5°C
K	2	+333°C...+1200°C	±0,0075 x (t°)

ISA (ANSI) MC96.1-1982

K	Standard	0°C...+1250°C	±2,2°C or ±0,75 %
K	Special	0°C...+1250°C	±1,1°C or ±0,4 %

DIN EN60584 part 2

E	1	-40°C...+375°C	±1,5°C
E	1	+375°C...+800°C	±0,0040 x (t°)
E	2	-40°C...+333°C	±2,5°C
E	2	+333°C...+1200°C	±0,0075 x (t°)

DIN EN60584 part 2

N	1	-40°C...+375°C	±1,5°C
N	1	+375°C...+1000°C	±0,0040 x (t°)
N	2	-40°C...+333°C	±2,5°C
N	2	+333°C...+1200°C	±0,0075 x (t°)

Type Class Temp. range Limiting error

DIN EN60584 part 2

J	1	-40°C...+375°C	±1,5°C
J	1	+375°C...+750°C	±0,0040 x (t°)
J	2	-40°C...+333°C	±2,5°C
J	2	+333°C...+750°C	±0,0075 x (t°)

ISA (ANSI) MC96.1-1982

J	Standard	0°C...+750°C	±2,2°C or ±0,75 %
J	Special	0°C...+750°C	±1,1°C or ±0,4 %

DIN EN60584 part 2

T	1	-40°C...+125°C	±0,5°C
T	1	+125°C...+350°C	±0,0040 x (t°)
T	2	-40°C...+133°C	±1°C
T	2	+133°C...+350°C	±0,0075 x (t°)

For type K there is a risk of blue mould forming between 850°C and 950°C, so we recommend using a type N if the working temperature is continuously in this range

9.2 General details

Ambient temperature:	-40...+150°C with ceramic terminal base -40...+85°C with transmitter
Meas. Range:	1.4404 max. 750°C, others max. 1100°C
Operating pressure:	(depending on model, see order details)
Connection head:	Form B with chain (other on request) Without head on models TWL-SN and TWL-SA

9.3 Materials

Sensor:	st. st. 1.4404 (type J) Alloy 600 (type K).
Neckpipe:	Stainless steel 1.4404 (others on request)
Connection head:	Aluminium, painted (st. st. on request)
Cable:	Silicone or PTFE on model TTL-SN and TTL-SA (others on request)
Terminal base:	Ceramic (without transmitter)

9.4 Process connection

Thread:	GM $\frac{1}{2}$, GM $\frac{3}{4}$, GM1, $\frac{1}{2}$ " NPTM, $\frac{3}{4}$ " NPTM, 1" NPT
Din-flange:	DN 15, 20, 25, 32, 40, 50
Weld-on sleeve:	Ø 24h7 (other on request)

9.5 ATEX-approval

 II 1 GD Ex ia IIC T4..T6/ Ex iaD 20 IP65
T85°C -20°C ≤ Ta ≤ +60°C

9.6 Head transmitter

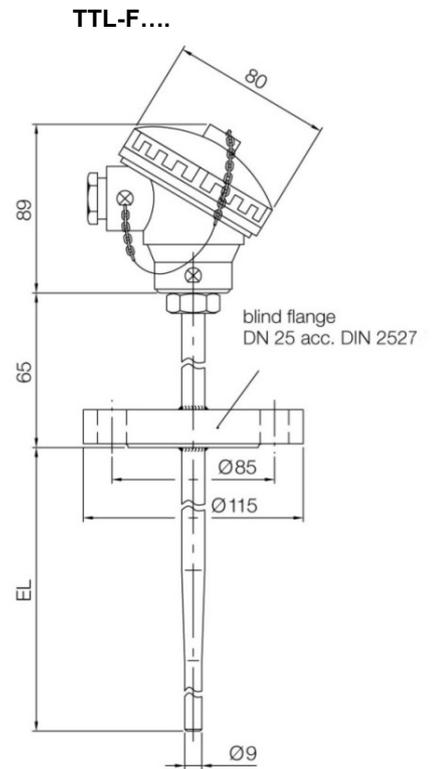

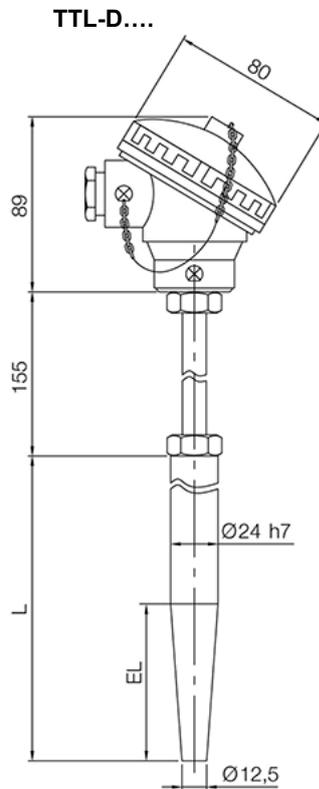

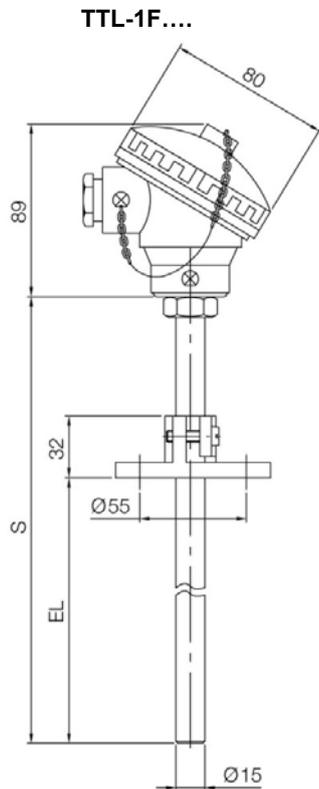

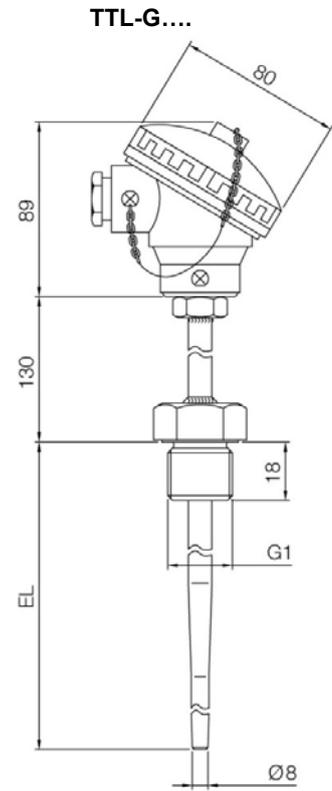

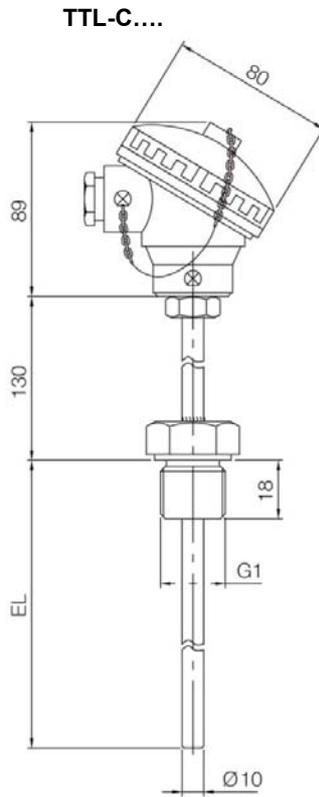

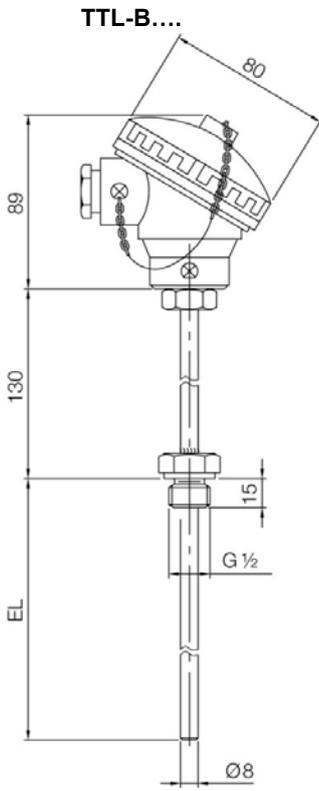

- Output:	analogue output 4...20m A
- Communication:	HART®-protocol PROFIBUS®/Fieldbus
- Minimum meas. span:	standard transmitter 25°K transmitter with HART® 10°K transmitter with PROFIBUS®/Fieldbus 5°K
- Supply voltage:	8...35 Vdc for standard transmitter and transmitter with Hart 9...32 Vdc for transmitter with PROFIBUS®/Fieldbus

Note

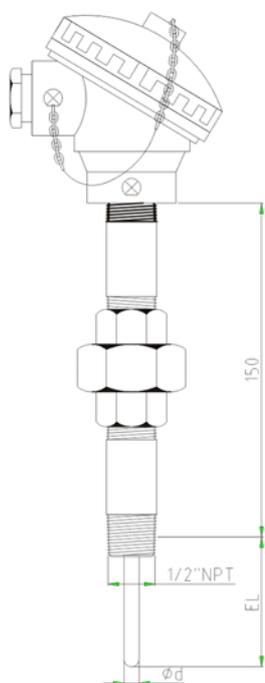

For programming of transmitter please refer to their separate programming manual.

Sensors model TTL-SN and TTL-SA have not head transmitter, you must use remote transmitter.

13 ATEX-Certificates

LABORATORIO OFICIAL J. M. MADARIAGA

(1) **EC-TYPE EXAMINATION CERTIFICATE**

(2) Equipment or protective system intended for use in potentially explosive atmospheres
Directive 94/9/EC

(3) EC-Type Examination Certificate nr **LOM 08ATEX2015 X**

(4) Equipment or protection system Temperature sensors
Types TWL... and TTL...

(5) Applicant KOBOLD MESURA, S.L.U.

(6) Address Grifé, 655
08918- Badalona (BARCELONA)
ESPAÑA

(7) This equipment or protective system and any acceptable variation thereto is specified in the schedule to this certificate and the documents therein referred to.

(8) Laboratorio Oficial J.M. Madariaga (LOM), notified body number 0163 in accordance with Article 9 of the Directive 94/9/EC of the European Parliament of 23 March 1994, certifies that this equipment or protective system has been found to comply with the Essential Health and Safety Requirements relating to the design and construction of equipment and protective systems intended for use in potentially explosive atmospheres, given in Annex II to the Directive.
The examination and test results are recorded in confidential report nr. **LOM 07.165 PP**

(9) Compliance with the Essential Health and Safety Requirements has been assured by compliance with:

Standards	EN 60079-0:2006	EN60079- 11:2007
-----------	-----------------	------------------

(10) If the sign X is placed after the certificate number, it indicates that the equipment or protective system is subject to special conditions for safe use specified in the schedule to this certificate.

(11) This EC-Type Examination Certificate relates only to the design and construction of this specified equipment or protective system in accordance with the Directive 94/9/EC. Further requirements of the Directive apply to the manufacture and supply of this equipment or protective system. These are not covered by this certificate.

(12) The marking of the equipment or protective system shall include the following:

	II 1 GD	Ex ia IIC T4..T6 Ex iaD 20 IP65 T85 °C -20 °C ≤ Ta ≤ +60 °C

LABORATORIO OFICIAL J. M. MADARIAGA

(A1) **SCHEDULE**

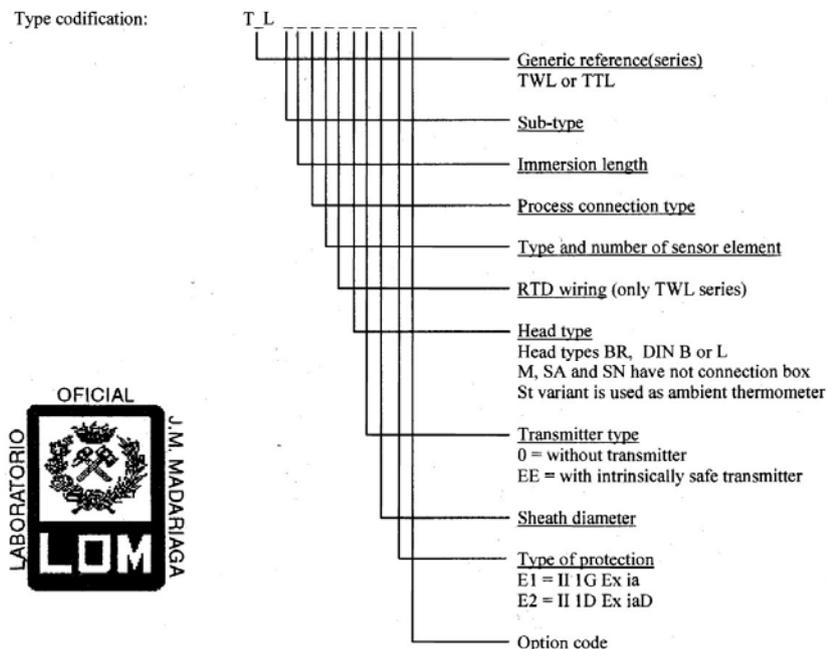

(A2) EC-Type Examination Certificate: **LOM 08ATEX2015 X**

(A3) Description of equipment or protective system

Temperature sensors based on thermocouple (TTL series) o thermoresistor RTD (TWL series) having a head in three formats and a sheath that contains the sensor element. Also is included an ambient thermometer (ST head) that uses a metallic or plastic enclosure.

Sensors can be connected either directly or indirectly by means of intrinsically safe transmitters placed into the head. Permitted intrinsically safety transmitters are listed in manufactured descriptive documents.

Type codification:

Temperature class

TWL series without transmitter: T4

TWL series without transmitter: T6

T_L series with transmitter: T4 to T6 temperature class is the same that the used intrinsically safe transmitter modules

Specific parameters of the type of protection

TWL series without transmitter: Pi: 1,2 W

T_L series with transmitter: Input specific parameters are the same that the used intrinsically safe transmitter modules
