BGF

Special versions up to 600 bar

- Measuring range:
10 - 100 ... 6000 - 60 000 l/h water
0.3 - 3.0 ... 170 - 1700 m³/h air
(20 °C, 1.013 bar)
- Accuracy: ±2% of full scale
- p_{max} : PN 40 (option: PN 400);
 t_{max} : -40 ... +200 °C
- Connection: flange
DN 15 ... DN 80, ANSI ½" ... 3"
- Material: stainless steel
1.4404/1.4571, PTFE
- Options:
Contacts, analogue output
with HART®, Profibus®-PA,
Foundation™ Fieldbus®

25

Description

Inside the flow tube, there is a star guided float which works towards a spring. An annular gap is produced between the cone-shaped magnet system and the meter ring in case of flows other than zero. The position of the magnet system depends on the resulting force of all forces acting upon it. These forces comprise the flow force, a spring force acting opposite to the flow force, and the buoyancy and weight force significant for the measurements in case of vertical installation. Each position of the magnet holder corresponds to a flow value measured during calibration, which is transferred to a scale. The BGF flow meter consists of a meter tube with connections, a meter ring, and a conical magnet holder. By means of a magnet, the position of the magnet system is transferred to an encapsulated follow magnet, which has been fitted to a pointer axle. The position of a second annular follow magnet fitted on the pointer axle is transferred to the scale by means of the pointer.

Application

The BGF meter is suitable for flow measurement of liquid or gaseous products in pipes. The special advantage is that it can be used for all directions of flow. It shows the current flow rate in volume or mass per unit in time.

Areas of Application

Flow measurement, monitoring, adjusting and control of liquid and gaseous products. The meter's design makes it ideal for processes under difficult and adverse operating conditions. The devices are available with additional electrical equipment for process monitoring and control.

- A large spectrum of wetted materials
- Magneto-resistive signal transmission
- Special design for high-pressure and high-temperature applications
- Excellent heat tracing technology (as option)
- Double eddy current damping (as option)

Technical Details

Fitting

Wetted parts:
Measuring tube st. st.: 1.4404 (316 L)/1.4571 (316 Ti), spring st. st. 1.4571
Measuring tube PTFE: PTFE, spring Hastelloy® C-22, special materials on request

Process connection: flanges acc. to EN 1092-1 ASME B16.5, DIN 2512, JIS, NPT, screw pipe, connection, special connections on request

Nominal pressure: PN 40, ASME Cl150 / 300 (standard) (BGF-S)

PN 16, ASME Cl150 (standard) (BGF-P)

higher pressure rates on request (max. 400 bar)

Process temperature: -40°C...+150°C (BGF-S with electrical output)
-40°C...+200°C (BGF-S without electrical output)
-40°C...+200°C (BGF-S with option V / H / W)
-40°C...+125°C (BGF-P)

Ambient temperature: -40°C...+80°C

Accuracy

Liquid/gas: ± 2 % of full scale
Additional inaccuracy by transmitter (ES): ± 0.2 %
Repeatability: ± 0.8 % of full scale

Certificate and accreditation

Explosion protection: BVS 03 ATEX H/B 112
Protection: IP 65 (Aluminium housing)
IP 67 (Stainless steel housing)

Advertisement

Material: aluminium (stove-enameled)
stainless steel (optional)
Electr. outputs: inductive switch (standard)
inductive switch (safety design)
microswitch
others on request
Ambient temperature: -40°C...+80°C (without switch)
-40°C...+65°C (with switch)

Technical Details (continued)

Transmitter

- ES with HART®-protocol
- ES with HART®-protocol and 2 NAMUR-switches
- ES with HART®-protocol and 1 NAMUR-switch / 1 pulse output
- ES with Profibus-PA®

Power supply: 14 - 30 V_{DC}
Outputs: passive, galvanically isolated
Currency: 4-20 mA
Binary 1 and 2: U_i = 30 V, I_i = 20 mA, P_i = 100 mW
Ambient temperature: -40 °C ... +70 °C

Certification and accreditation

Explosion protection: DMT 00 ATEX E 075
Type of protection:  II 2G EEx ia IIC T6

Additional options

- Other materials
- Other flange versions and sizes
- Certifications and certificates
- Display with pressure compensations against condensate build up
- Microswitch
- Inductive switches in safety design

All-Metal Variable Area Flow Meter Model BGF

Order Details (example: BGF-S 15305B H K O O 0 S 1 0 0 K)

¹⁾ Not for model BGF-P (PTFE-coating)³⁾ IEC 61508-2:2010 Conformity confirmed by EXIDA

For the right design of the flowmeter we need the following data:
 measuring range with unit, measured media, process temperature and pressure, viscosity,
 operating density (liquids), norm density (gases), mechanical connection.

Dimensions [mm]
